NEWS RELEASE – March 1, 2018

**Blue Sky Uranium Oversubscribed
Company Closes Non-Brokered Private Placement**

Vancouver, BC / Globe Newswire / March 1, 2018 / Blue Sky Uranium Corp. (TSX-V: BSK, FSE: MAL2; OTC: BKUCF), "Blue Sky" or the "Company") is pleased to announce completion of the non-brokered private placement financing of 7,258,500 units ("Units") for gross proceeds of \$1,451,700 as announced on February 20, 2018.

Each unit will consist of one common share and one transferrable common share purchase warrant. Each warrant will entitle the holder thereof to purchase one additional common share in the capital of the Company at \$0.35 per share for two years from the date of issue, expiring on February 28, 2020. If the volume weighted average price for the Company's shares is \$0.75 or greater for a period of 5 consecutive trading days, then the Company may deliver a notice (the "Notice") to the warrant holder that the Warrants must be exercised within twenty (20) days from the date of delivery of such Notice, otherwise the Warrants will expire at 4:30 p.m. (Vancouver time) on the twenty-first (21st) day after the date of delivery of the Notice. The accelerated exercise shall not apply until the expiration of the four-month hold period required under Exchange policies and rules, and securities laws that are applicable to the Company, being June 28, 2018.

Finder's fees of \$14,525 are payable in cash on a portion of the private placement to parties at arm's length to the Company. In addition, 72,625 non-transferable finder's warrants are issuable (the "Finder's Warrants"). Each Finder's Warrant entitling a finder to purchase one common share at a price of \$0.35 per share for two years from the date of issue, expiring on February 28, 2020. The Finder's Warrants are also subject to the above accelerated exercise provisions.

The proceeds of the financing will be used for exploration programs on the Company's projects in Argentina and for general working capital.

This financing is subject to regulatory approval and all securities to be issued pursuant to the financing are subject to a four-month hold period expiring on June 28, 2018.

About the Amarillo Grande Project

This new 140-kilometre-long uranium district was first identified, staked and underwent preliminary exploration by Blue Sky from 2007 to 2012 as part of the Grosso Group's strategy of adding alternative energy focus to its successful portfolio of metals exploration companies. The proximity of several major targets suggests that if resources are delineated a central processing facility could be utilized. The area is flat-lying, semi-arid and accessible year-round, with nearby rail, power and port access.

Mineralization identified to date at Amarillo Grande has characteristics of sandstone-type and surficial-type uranium-vanadium deposits. The sandstone-type deposit is related to a braided fluvial system comprising a potentially district-size "roll front" system where uranium minerals occur in porous poorly-consolidated sandstones and conglomerates. In surficial-type uranium deposits, carnotite mineralization coats loosely consolidated pebbles of sandstone and conglomerates. Carnotite is amenable to leaching, and preliminary metallurgical work indicates that the mineralized material can be upgraded using a very simple wet screening method. The near-surface mineralization, ability to locally upgrade, amenability to leaching and central processing possibility suggest a potentially low-cost development scenario for a future deposit.

About Blue Sky Uranium Corp.

Blue Sky Uranium Corp. is a leader in uranium discovery in Argentina. The Company's objective is to deliver exceptional returns to shareholders by rapidly advancing a portfolio of surficial uranium deposits into low-cost producers. Blue Sky holds the exclusive right to over 434,000 hectares (equiv. to 1,072,437 acres) of property in two provinces in Argentina. The Company's flagship Amarillo Grande Project was an in-house discovery of a new district that has the potential to be both a leading domestic supplier of uranium to the growing Argentine market and a new international market supplier. The Company is a member of the Grosso Group, a resource management group that has pioneered exploration in Argentina since 1993.
